

**Pelvic
mesh
implants**

**Primodos
and hormonal
pregnancy tests**

**Sodium
valproate***
and valproate
products including
Epilim and Depakote

If you have personal experiences arising from any of the above, an independent review, commissioned by the Government, wants to hear from you.

*The Review is specifically interested in hearing from women who have taken sodium valproate while being of child-bearing age.. Women prescribed Epilim or Depakote (sodium valproate) should not stop their treatment unless told to do so by their GP or healthcare professional.

Share your experience and find out more, including about our regional events at: [IMMDSReview.org.uk](https://www.immdsreview.org.uk)
